# Introduction

---

## Scope

The purpose of the Release Note is to document the new functionality provided by the release and any known issues or limitations.

The release notes will also record any administrative instructions that are specific to this release and not recorded elsewhere.

Release Notes for previous versions are available [online](#).

The system requirements and technical guidance are found in the Installation Guide. For more information visit our [WebHelp](#) which includes Installation Guides, Quick Start Guides, worked examples and more.

## Purpose of Release

The purpose of 1Edit version 3.7 is a minor release for limited customer availability.

## System Requirements

---

### Supported Operating Systems

OS	Notes/Caveats
Windows 10	See Important Notes – Operating Systems.
Windows 11	This is newly supported, please test in your specific environments.

### Device Specification

Windows devices with 8GB RAM or above are recommended.

### Important Notes – Operating Systems

Customers using Windows 10 should update to the Windows 10 21H2 update or Windows 11 in readiness for the next general availability release (1Edit version 4.1) in H1 2025.

Windows 10 will still be supported in 1Edit 4.1, but this must be Windows 10 21H2 (OS Build 19044).

End of support notice is served for any Windows 10 updates not stated above, which will apply to 1Edit version 4.1, including Windows 10 1809.

## Release Details

---

1Edit version 3.7 is the latest software for limited customer release.

Users adopting version 3.7 from older versions should review each of the release notes since the last adopted release.

### Notable Differences

- Fix for issues in Windows 11

### New Features

Note: For new features prior to version 3.7, please see our online [Release Notes](#).

There are no new features in version 3.7.

### Bugs Fixed

Note: For bugs fixed prior to version 3.7, please see our online [Release Notes](#).

### Version 3.7

ID	Description
PRIS-6410	1Edit stops saving favourites on the attribute dropdown list when there are more than 20 entries.
PRIS-6322	Opening 2 instances of 1Edit shows a 'Cannot modify' config error
PRIS-6341	Handwriting pad appears by default for editing text fields
PRIS-6376	TotalStation settings close to the bottom of the screen on the 'Survey Devices setting panel'

## Known Issues and Unresolved Bugs

ID	Description
PRIS-6362	Setting Amber and Red DOP values using a stylus causes 1Edit to freeze. Until this is fixed, users can use the touch method, and the issue does not occur.
PRIS-5866	Implement better fix for hang on CloseAsync() in GPS device
PRIS-5803	When using 1Edit on a dual monitor setup where they are laid out vertically with 1Edit showing on the second monitor; on moving a point feature or vertex by dragging with the mouse, the feature or vertex is sometimes deleted. Undo can restore the feature or vertex
PRIS-5632	Transfer In - If you cancel folder picker during Transfer in you get an Object reference not set error. This error is harmless and can be ignored.
PRIS-4967	1Edit crashes when showing Red GPS traffic light when zoomed in to 200% and using the stylus
PRIS-4914	Increase / Decrease / Set Vertex Heights does not work for a single part of a multi-part polygon
PRIS-4881	Camera being used by another application needs better warning message and results in 1Edit error: Hardware MFT failed to start streaming due to lack of hardware resources. Add better warning message
PRIS-4067	Windows 10: Null_On_Unset reflexes are not triggered if global parameter sets the source to null
PRIS-3994	Deleting a hole may leave an out-of-date highlight until the next redraw
PRIS-3922	Reflex methods do not fire on the feature at the 'other end' of a reference. This means that changing the references will not change the metadata for those referenced features. Workaround is that if you need to change feature references, then select the features that have the reference metadata and make the updates to those features
PRIS-3797	Preview the adjusted tie out distance in prorata causes an error in the application when the baseline contains duplicate points
PRIS-3792	1Edit freezes when forcing zoom to extents while WMTS map redraw is still in progress
PRIS-3767	Managing references - de-select causes references to be removed
PRIS-3719	When using WMTS and the 'use simpler animations for performance' setting on, zooming appears to jump one level too far and then jump back
PRIS-3287	Undo/Redo does not trigger on-the-fly revalidation for the affected features
PRIS-3278	Topology bookmarks are not being updated when doing bulk topology structuring
PRIS-3226	Local Validation does not revalidate features adjacent to a deleted feature so lone deleted features do not cause revalidation
PRIS-3200	Manual Traverse - Keyboard pops up when creating baseline. Workaround is to close the class selector list first
PRIS-2969	Passwords with + or % characters fail when logging into 1Edit worklist
PRIS-2496	Cannot delete a project after a template has been built from it without restarting 1Edit
PRIS-1735	Digitise circle creates closed line not area

## Important Notes

### Important Notes

This 1Edit version has a code signing certificate and Gothic license which will not expire until 2027.

Version 3.7 uses the installation directory *C:\Users\<user>\AppData\Local\Packages* (where the projects are stored) *1Spatial.1Edit\_y9kp27q9aegam*. This may be different from previous versions so customers with any folder specific deployment/configuration tools should make the necessary adjustments.

When installing version 3.7 of 1Edit and upgrading from a version before 3.2 then a copy of projects and templates are placed in the *1Spatial.1Edit.Backup* folder. These are restored to the correct place after installing, and this folder is left in place in case there are issues with upgrade. When upgrading from versions 3.2.0 onwards then the projects are transferred directly without performing a backup.

Projects created with previous versions of 1Edit prior to 3.0 may be incompatible with this version. Therefore, we advise you to delete your projects and recreate them in the new version after upgrade.

Please contact 1Spatial support for further information if you are still having difficulty mitigating the issues described above.

## Product Documentation and Support

---

### Documentation

To review product documentation such as Installation Guides, WebHelp and other release notes, please visit our website: <https://1spatial.com/documentation/Hub/1Edit.htm>

### Support

If assistance is required while deploying this release, contact either your distributor or 1Spatial Support.

To contact 1Spatial Support, please visit our website:
