## Introduction

---

### Scope

The purpose of the Release Note is to document the new functionality provided by the release and any known issues or limitations.

The release notes will also record any administrative instructions that are specific to this release and not recorded elsewhere.

Release Notes for previous versions are available [online](#).

For more information visit our [WebHelp](#) which includes Installation Guides, Quick Start Guides, worked examples and more.

### Purpose of Release

This is a minor release that brings compatibility with 1Integrate 4.4 and fixes a couple of minor bugs.

## System Requirements

---

### Supported Operating Systems

OS	Notes/Caveats
Windows Server 2016-2022	
Linux 64 bit	

### Supported Databases

PostgreSQL	12.6 or later
Oracle	19c R1 or later
MS SQL Server	2019 or later

### Supported Browsers

Google Chrome	128
Microsoft Edge	128
Mozilla Firefox	129

### Other Pre-requisites

1Integrate (required)	4.2.x, 4.3.x
Java RE	17 64bit

### Note about the Java version

From this version (2.14), 1Data Gateway requires Java 17. As 1Integrate uses Java 11, if both applications are installed on the same machine, we recommend setting Java 11 as the default JVM and specify the path of the Java 17 executable for 1DG.

On Windows, to use a non-default copy of Java with 1Data Gateway, supply the path to the Java Runtime Environment to the MSI installer as a parameter named "JREDIR", e.g.:

```
data-gateway-2.14.0.msi JREDIR="c:\Program Files\Java\jdk-17\"
```

On Linux, specify the full path to the Java 17 runtime executable in the 1datagateway.sh executable.

## Release Details

---

### Notable Differences

- Certified for 1Integrate 4.4

### New Features

Note: For new features added in previous versions, please see our online [Release Notes](#).

ID	Description
DG-3600	Validate support for 1Integrate v4.4

### Bugs Fixed

Note: For bugs fixed in previous versions, please see our online [Release Notes](#).

ID	Description
DG-2513	Helm: default admin username/password cannot be set
DG-3606	User Manager cannot edit or remove access group with no roles

### Known Issues and Unresolved Bugs

None

### Deprecated features

The possibility to restrict assignments to specific users is deprecated and will be removed in a future release.

### Notes for upgrades from previous versions

Due to the implementation of the ordering of inputs and for configurations existing when upgrading from versions prior to 2.13, the input datastores will be ordered alphabetically. This order can be changed in the Specification configuration.

## Product Documentation and Support

---

### Documentation

To review product documentation such as Installation Guides, WebHelp and other release notes, please visit our website: <https://1spatial.com/documentation/1datagateway/>

### Support

If assistance is required while deploying this release, contact either your distributor or 1Spatial Support.

To contact 1Spatial Support, please visit our website:
