## Introduction

---

### Scope

The purpose of the Release Note is to document the new functionality provided by the release and any known issues or limitations.

The release notes will also record any administrative instructions that are specific to this release and not recorded elsewhere.

For more information, please visit our online [WebHelp](#), which includes Release Notes for previous versions, Installation Guides, Quick Start Guides, and more.

### Purpose of Release

This is a minor release that fix a bug found in v2.15.0 just after release.

## System Requirements

---

### Supported Operating Systems

OS	Notes/Caveats
Windows Server 2016-2022	
Linux 64 bit	

### Supported Databases

PostgreSQL	12.6 or later
Oracle	19c R1 or later
MS SQL Server	2019 or later

### Supported Browsers

Google Chrome	135
Microsoft Edge	135
Mozilla Firefox	137

### Other Pre-requisites

1Integrate (required)	5.x
Java RE	21 64bit

## Release Details

---

### Notable Differences in v2.15

- Certified for 1Integrate 5.2
- New unified management of submission metadata and datastore parameters
- Metadata defaults at Assignment level
- Refresh output schema from source schema
- Task headers

### New Features

ID	Description
DG-3928	Validate 1DG 2.15 against 1Integrate 5.2
DG-3653	Configure default Data Store Parameters at Assignment level
DG-3672	Refresh output schema when cloning a datastore
DG-3691	Task Headings
DG-3784	Make API Key management APIs public
DG-3790	Consolidate Metadata and Datastore Parameters and defaults
DG-3903	Update Helm chart to support Azure Application Insights

### Bugs Fixed in v2.15.1

ID	Description
DG-3959	2.15 database upgrade fails when data store parameters have been used
DG-3962	2.15 importer fails when export contains null data store parameter values

### Bugs Fixed in v2.15.0

ID	Description
DG-2783	Background tasks sometimes stop working
DG-3444	Predefined extents in Open Data tasks don't clone properly
DG-3710	clamscan error output not properly logged
DG-3724	Map viewer task counts inconsistent with 1Integrate
DG-3873	When selecting from multiple data stores CRS values are displayed incorrectly
DG-3878	Unable to view specifications when 1Integrate action is missing
DG-3894	Mail Template - Default createdAt field renders as \${null}
DG-3904	Cannot change session to session referencing same datastore
DG-3917	Deleting User does not delete Identity Provider Links

Note: For new features added and bugs fixed in previous versions, please see our [WebHelp](#).

## Known Issues and Unresolved Bugs

- Current behaviour for submission session metadata values (Strings and Passwords) is that once a value has been entered it is impossible to reset it to null, if you type and then remove the string then it gets set to empty string. This will be resolved in the next release.
- System Managers can view but not access schedules. The workaround for this is, as System Manager, add yourself to the supplier as Supplier Supervisor to be able to access it.
- Expiring Schedules are not marked as inactive

## Deprecated features

The possibility to restrict assignments to specific users is deprecated and will be removed in a future release.

## Notes for upgrades from previous versions

Due to the implementation of the ordering of inputs and for configurations existing when upgrading from versions prior to 2.13, the input datastores will be ordered alphabetically. This order can be changed in the Specification configuration.

## Product Documentation and Support

---

### Documentation

To review product documentation such as Installation Guides, WebHelp and other release notes, please visit our website: <https://1spatial.com/documentation/1datagateway/>

### Support

If assistance is required while deploying this release, contact either your distributor or 1Spatial Support.

To contact 1Spatial Support, please visit our website:

<https://1spatial.com/support-services/support/>

### Training

Maximise the value of this release with 1Spatial foundation and advanced training courses.

For training enquiries please contact your Account Manager or email: [training@1spatial.com](mailto:training@1spatial.com)
