Introduction

Scope

The purpose of the Release Note is to document the new functionality provided by the release and any known issues or limitations.

The release notes will also record any administrative instructions that are specific to this release and not recorded elsewhere.

For more information, please visit our online WebHelp, which includes Release Notes for previous versions, Installation Guides, Quick Start Guides, and more.

Purpose of Release

This is a major release that brings compatibility with 1Integrate versions 5.1 and 5.2 and includes the ability to submit files to external REST API endpoints among other features.

System Requirements

Supported Operating Systems

OS	Notes/Caveats
Windows Server 2016-2022	
Linux 64 bit	

Supported Databases

PostgreSQL	12.6 or later
Oracle	19c R1 or later
MS SQL Server	2019 or later

Supported Browsers

Google Chrome	138
Microsoft Edge	138
Mozilla Firefox	137

Other Pre-requisites

1Integrate (required)	5.x
Java RE	21 64bit

 © 2025 1Spatial Plc.

Release Details

Notable Differences

- Certified support for 1Integrate 5.1 and 5.2
- Submission of input and output files to external APIs
- Support login with email and password within the ArcGIS Pro add-in
- Support Schema Mapping within the ArcGIS Pro add-in

New Features

ID	Description
DG-3610	Support Schema Mapping from the ArcGIS Pro add-in
DG-3611	Support login with user/pass from the ArcGIS Pro add-in
DG-3809	Support external Submission Service
DG-3924	Remove Session Metadata String values
DG-3945	Support ZIP files with explicit directory entries for project import

Bugs Fixed

ID	Description
DG-3949	System Managers can view but not access schedules
DG-3950	Expiring Schedules are not marked as inactive
DG-3951	If I know the assignment key, I can see the My Assignment page even without an assignment
DG-3952	Project Managers can't edit Assignments e.g. to change default values (unless they are in the supplier)
DG-3961	Error on saving default value (Long) when entering out of the range value
DG-3970	Password Requested Audit event doesn't correctly record performer
DG-3989	Boolean metadata values - When default value is not defined value is incorrectly initialised as null
DG-4014	System admins cannot see schedules in System Activity unless they are Data Viewers or members of the assignment or Schedule Owner
DG-4025	Action results are returned in API for users who shouldn't see them

Note: For new features added and bugs fixed in previous versions, please see our WebHelp.

Known Issues and Unresolved Bugs

- None

Deprecated features

The ability to restrict assignments to specific users will be removed in a future release.

Support for Oracle as the application underlying database will be removed in version 3.

 © 2025 1Spatial Plc.

Notes for upgrades from previous versions

Due to the implementation of the ordering of inputs and for configurations existing when upgrading from versions prior to 2.13, the input datastores will be ordered alphabetically. This order can be changed in the Specification configuration.
