

Carbon Reduction Plan

Supplier name: **1Spatial Group Limited**

Publication date: 22/09/2022

Commitment to achieving Net Zero

1Spatial Group Limited is committed to achieving Net Zero emissions by 2050 (with 90% absolute reduction in Scope 1 & 2 and 97% reduction in intensity of Scope 3)

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022

Additional Details relating to the Baseline Emissions calculations.

This is the first time we have reported our carbon footprint so this calculation establishes our baseline. It is based on our financial accounting year of 1 February 2021 - 31 January 2022. We anticipate that our business will continue to grow in the coming few years. As a result, and in anticipation of a post-Covid world of work, we may consider re-baselining our figures in the next financial year.

Our Baseline calculation includes:

- Scope 1: Direct Emissions
- Scope 2: Indirect Emissions
- Scope 3 Categories: 3: Fuel and energy related activities: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking:

Our Baseline deviates from the requirements under PPN 06/21 as follows:

- Scope 3 Categories: 9: Downstream transportation & distribution: The business does not sell or transport any goods to its customers
- Scope 3 Categories: 3: Fuel and energy related activities: are included, although this is not a requirement.

Baseline year emissions:	
Emissions	TOTAL (tCO₂e)
Scope 1	1 tCO₂e
Scope 2	36.6 tCO₂e
Scope 3 (included sources as detailed above)	26.9 tCO₂e
Total Emissions	64.4 tCO₂e

Carbon Reduction Plan

Current Emissions Reporting

Reporting Year: 1 February 2021 - 31 January 2022	
Emissions	TOTAL (tCO₂e)
Scope 1	1 tCO₂e
Scope 2	36.6 tCO₂e
Scope 3 (included sources as detailed above)	26.9 tCO₂e
Total Emissions	64.4 tCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

1) We project that the intensity of our total carbon emissions will decrease over the next fifteen years to 0.3 tCO₂e/FTE (full time equivalent employee) by 2036. This is a reduction of 50 %

Progress against this target can be seen in the chart below:

This is broken down into separate targets for our Operational and Value Chain emissions:

- a) We project that our Operational carbon emissions will decrease absolutely over the next 5 years by 4.2% each year (a total of 21% by 2027)
- b) We project that our Value Chain carbon emissions will decrease in intensity over the next 5 years by 7% each year (a total of 30% by 2027)

Carbon Reduction Plan

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the baseline and the measures will be in effect when performing the contract.

- Developed baseline targets and implemented measures to track carbon emissions.
- Sustainable travel scheme support globally, including subsidies available for using public transport or bikes.
- Electric vehicle charging installation, with future company vehicle procurement review.
- We have recycling initiatives across our offices including recycling our computer equipment. We actively source and choose recycled stationary and other office supplies wherever possible.
- We have offset the emissions from our website.

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Create awareness organisation-wide about carbon reduction plan and commitment towards Net Zero.
- Identify opportunities for additional carbon offsetting initiatives.
- Commit to specific initiatives to reduce carbon emissions.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
